

# Release notes - Presenter 1.3

## 1.1 Release date and general info

The Presenter 1.3 release will take place on Monday the 31st of January.  
This release consists of the following new features, improvements and bug fixes.

## 1.2 Nieuwe functies en verbeteringen

Function	Platform	Description
Welcome window	All platforms	After logging in, a welcome screen appears from which recently opened and favourite files can be opened directly.
Mini-tool 'Spotlight'	All platforms	The fly-out with mini-tools in the toolbar now shows a flashlight, which allows you to hide all content and shine the 'light' on specific content.
Mini-tool 'Geo triangle'	All platforms	The mini-tool geodesic 'snaps' to the horizontal mode.
Tool 'Classroom planner'	All platforms	The inventory is now collapsible, leaving more working space in the tool.
Tool 'Topography US'	All platforms	The possibility of practising the regions has been added.

## 1.3 Fixed bugs and issues

The Presenter 1.3 release contains the following bug fixes.

Bug	Platform	Description
Shapes in Central	Central	The shapes in Central are viewed correctly
Apple pen	iOS app	The Apple pen works correctly again in the Presenter iOS app.

Tool 'Sum maker'	All platforms	The answers are displayed correctly again.
Tool 'Scale'	All platforms	The 'Scale' tool displays the correct grams or kilograms again after adjusting the settings.
Tool 'Ratio table'	All platforms	The 'Ratio table' tool shows the correct selection frame again when it is selected.
Tool 'Topography Germany'	All platforms	It is again possible to adjust the settings of the 'Topography Germany' tool.
Tool 'Classroom planner'	All platforms	The items in the tool are no longer selected after reopening the tool in a saved Presenter file.
Fly-outs in the toolbar	All platforms	The fly-outs in the toolbar open again with the second selection click.
Removing a link	All platforms	When a web link placed on an object is deleted, it is no longer the object that is deleted but the link.
Onscreen keyboard	All platforms	The onscreen keyboard is automatically closed again when a link is added to an object.
Bullets	All platforms	Underlining of bullets is disabled.
