

Prowise PC Module - User Manual

OPS G2: PW.2.17017.0001 | OPS G2 + vPro: PW.2.17017.0002

Prowise PC Module

A Prowise PC module transforms your touchscreen into a real computer. Placing the PC module in the OPS slot gives you instant access to Windows 10 without the need to connect an external laptop or computer with cables.

Disclaimer

The functions and features described in this user guide apply to most of the models. It is possible that not all the functions and features are available on this model.

By installing, downloading or otherwise making use of a software product that has been previously installed on the Prowise PC module, you confirm that you agree to the terms and conditions of the related software manufacturer.

1. Get to know your PC module

1.1 In the box

PLEASE NOTE! Check whether the delivery is complete. If not, please contact our service desk in writing within five days after delivery. Please advise the serial number and a copy of the packing slip.

DANGER! Keep the packaging material, such as the foils, out of the reach of children. Improper use can cause suffocation hazard.

1.2 Front

1	Mounting Bolt	Mounts the module to the touchscreen
2	WiFi Antenna	The antennas enable a strong WiFi connection with your PC module.
3	LED	Indicate whether your PC module is switched on (green LED) and whether the SSD is active (red LED).
4	USB Type C	The USB Type C port offers the quickest data transfer and the best way to connect devices such as mobile phones or a camera.
5	USB 2.0	Use the USB 2.0 port for transferring data or connecting devices such as a keyboard, mouse or external hard disc.
6	USB 3.0	Use the USB 3.0 port for transferring data or connecting devices such as a keyboard, mouse or external hard disc.
7	Ethernet port	Use the Ethernet port to connect an internet cable.
8	HDMI 1.4	Connect an HDMI cable here to play or show an audio and/or video clip from the PC module on a second screen.
9	Audio	3.5mm connection for audio such as headphones.
10	Microphone connection	3.5mm connection for a microphone.

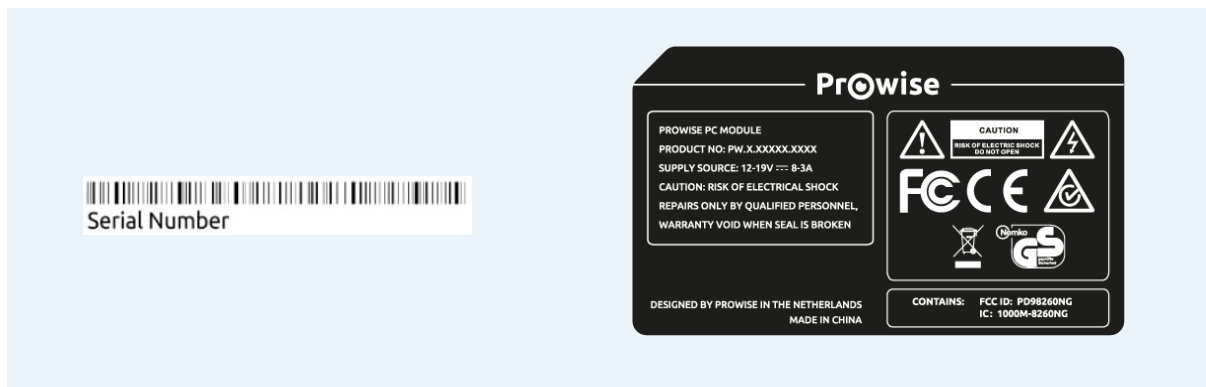

1.3 Back

- 1 80-pin connector This connector is meant for connecting the PC module to the Prowise Touchscreen.

1.4 Labels

Labels provide important information for identifying your PC module. For instance, you can find information such as the serial number, product number or Prowise details you need in case you contact the Prowise customer service.

2. Connectivity

2.1 Wireless LAN

With a WiFi connection you can connect to a wireless network. A WiFi connection is required to use Prowise software such as Prowise Reflect.

Make sure you know which WiFi network to connect to and have the right network security key (password) before installing the WLAN.

Click on the WiFi icon in the taskbar to turn on the WiFi on the PC module. Select the right network and enter the password.

For more information, please visit www.prowise.com/FN/customer-service.

2.2 VPN

With a VPN connection you can connect to a private network, for instance that of a school or business. A VPN connection (Virtual Private Network) provides the user with a secured and anonymous access to a network and therefore makes the internet connection safer.

Before connecting to a VPN, you need to create a VPN profile on your system. This can be done in two ways:

- Create a VPN profile yourself.
- Create a VPN profile for your work with a business account.

In case you do not have a VPN profile, you need to create one before being able to connect. You can find out how to do this on www.prowise.com/FN/customer-service.

2.3 Bluetooth

To turn on the bluetooth on your PC module, select the menu icon in the bottom-right of your screen in the taskbar. Click on the bluetooth icon to open the bluetooth menu and choose your desired option.

For more information, please visit www.prowise.com/FN/customer-service
