

Release notes - Presenter 1.1

1.1 Release date and general information

The Presenter 1.1 version will be released on:

In this release, the Presenter desktop app for Windows is also released. With this release, both the features 'Annotate' and 'Screen recording' will become available in the Windows app.

1.2 New features and improvements

Function	Platform	Description
Desktop app	Windows desktop app	The desktop app for Windows can be downloaded via www.prowise.com from Friday afternoon, 21 May 2021.
Annotate	Windows desktop app	Minimise your Presenter software and use the writing tools in the Annotate bar to take notes over other apps and programmes. Easily add various types of screenshots of your notes to your Presenter file.
Screen recording	Windows desktop app	Make a screen recording, including all actions and audio.
Adjust line and fill colour and line thickness of an object	All platforms	You can now adjust the line colour, fill colour and the line thickness after adding written text, shapes or lines on the canvas.
Pasting objects	All platforms	Objects that were cut or copied elsewhere are no longer pasted in the middle of the canvas, but in the same position as where the cutout or copy was made.

1.3 Fixed bugs and issues

The Presenter 10.1 release includes solutions for the following bugs.

Bug	Platform	Description
Collaboration	All platforms	You can once again invite participants when a collaboration has already started
The virtual keyboard	All platforms	The virtual keyboard closes automatically once the text mode is no longer active.
Tool Flashcards	All platforms	The tool Flashcards loads with the correct time settings.
Tool Name picker	All platforms	The names no longer fall outside of the boundaries of the tool in the settings menu.
Tool Topography - the Netherlands	All platforms	The boundaries of the province of Utrecht have been updated.
Tool Topography - Europe	All platforms	Macedonia has been changed to North Macedonia.
Tool empty number line	All platforms	It is possible to set 10 subunits again.
Tool Hundred field	All platforms	The button 'Show all numbers' is working again.
Import PDF	All platforms	In addition to importing .pdf files, it is also possible to import .PDF files in Presenter.
File management and media library	All platforms	It is no longer possible to open the file management and the media library over each other if the pan mode is enabled.
Loading lessons	All platforms	Various improvements with regard to loading lessons have been implemented.
